

TONE 6 CLARINET - NOTEBENDING

Learning to note bend gives us greater control of our tuning. We bend the notes by widening the back of our throat and relaxing our jaw.

- When you bend the note down hold it steady at the lower pitch for two beats before rising.
- Use a tuner at all times to check whether the top and bottom notes are in tune.
- Play very slowly and carefully. Aim for a smooth and gradual bend.

It gets harder to bend notes the lower we go.

play as written bend the note sim.
